

## Admissions Portal: Streamlining Process

This presentation outlines the design and development of a web-based portal for IIT Goa to streamline process.

# Project Overview

.

## Objective

Create a streamlined COAP portal for IIT Goa.

Enhance the applicant and admin experience.

## Scope

User-friendly and secure interface.

Robust backend and efficient data management.

# Technology Stack

## Frontend

HTML, CSS, JavaScript, Bootstrap

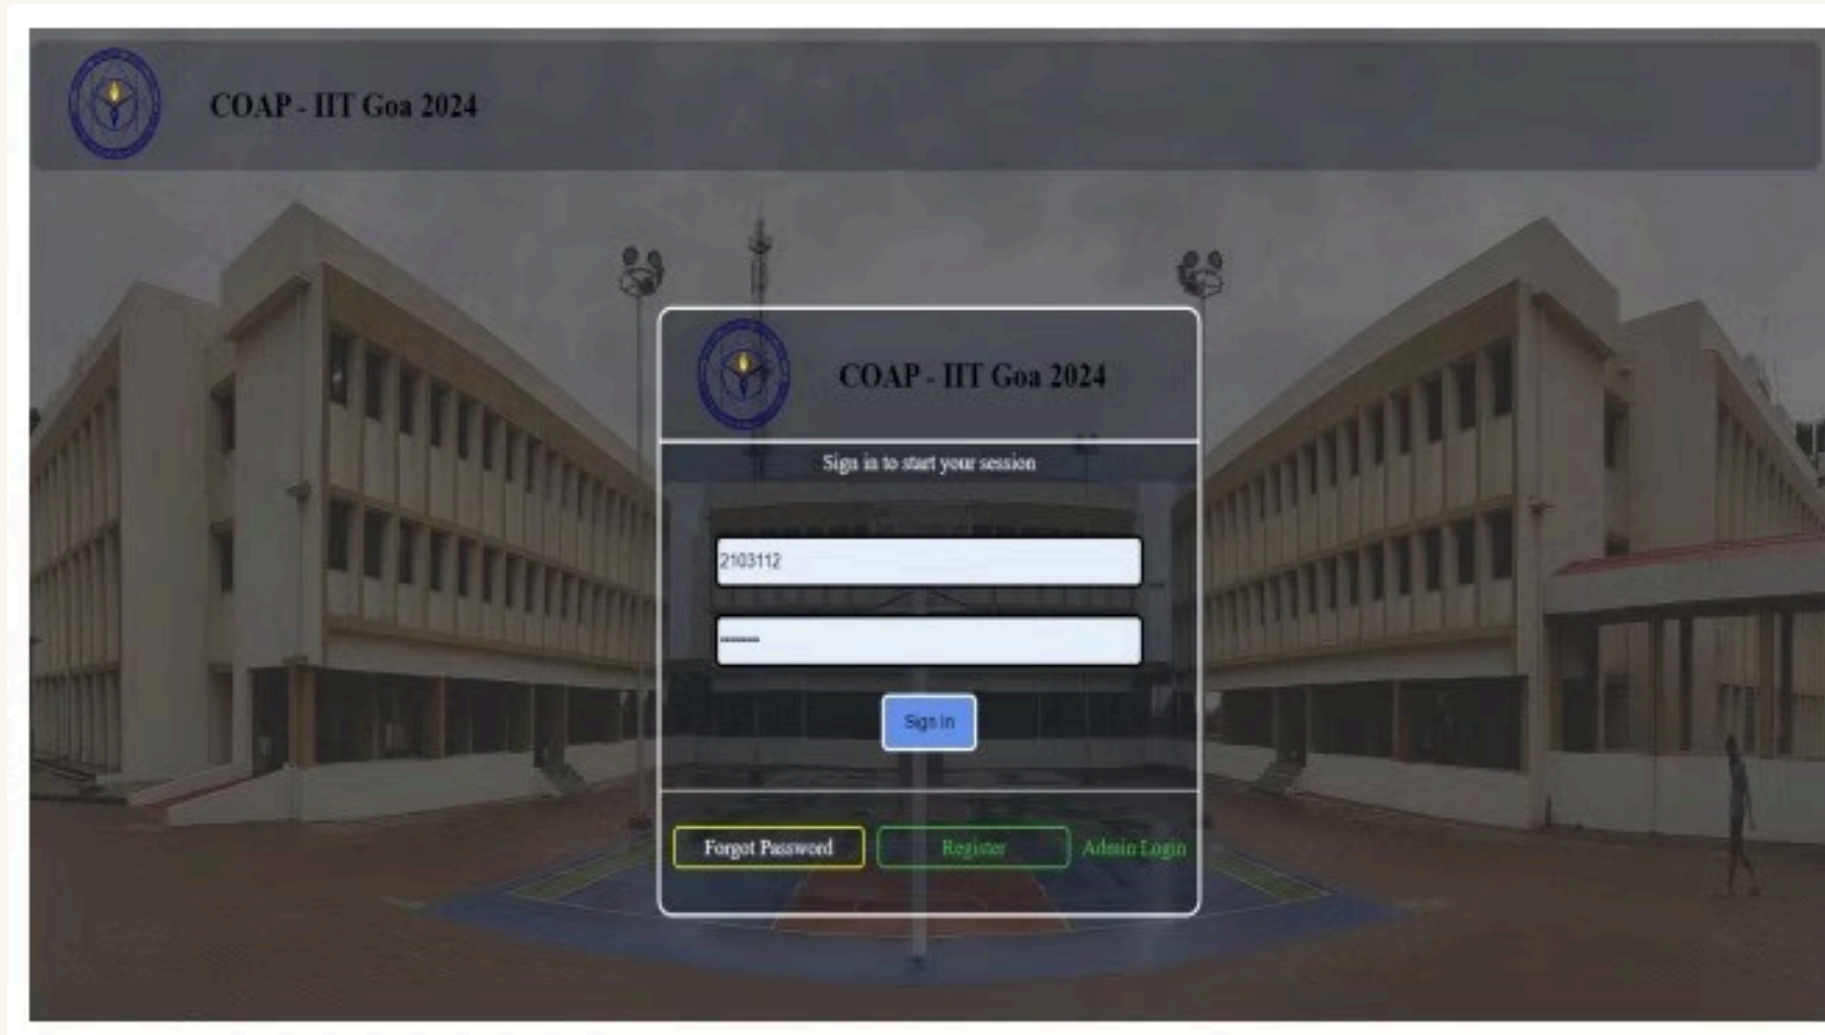

## Backend

Flask (Python)

## Database

PostgreSQL

# Frontend Development: Login Page Design

## **Responsive Design**

Create a responsive login page with inputs for COAP Registration ID and password.

## **JavaScript Validation**

Enforce minimum and maximum character limits for ID and password fields.

## **Session Management**

Check session storage on page load and use cookies for 1-hour login persistence.

# Backend Features

## Functionalities

User authentication and session management

Data storage and retrieval in PostgreSQL

## API Endpoints

/login: Authenticate users

/register: Register new applicants

/changepassword: Update user passwords

COAP - IIT Goa 2024

## COAP Registration - IIT Goa

ONLINE applications are invited for Admission to M. Tech Programme at IIT GOA starting from Autumn Semester of Academic Year: 2023-24. (July 2023)

COAP - IIT Goa 2024

Fill The Details For F

### Personal Details:

# Registration Page Implementation

## HTML Structure

Define the layout and structure of the registration page with form inputs and a registration button.

## CSS Styling

Use inline styles to define text color, alignment, and visual hierarchy for key elements.

## JavaScript Functionality

Validate required fields and use the fetch API to send registration data to the backend.

# Security:

- – SHA-256 Password Hashing
- – Parameterized Queries to Prevent SQL Injection

# Applicant and Dashboard Page

# Admin Login Page

## Admin Credentials

Capture user inputs for adminid and adminpass.

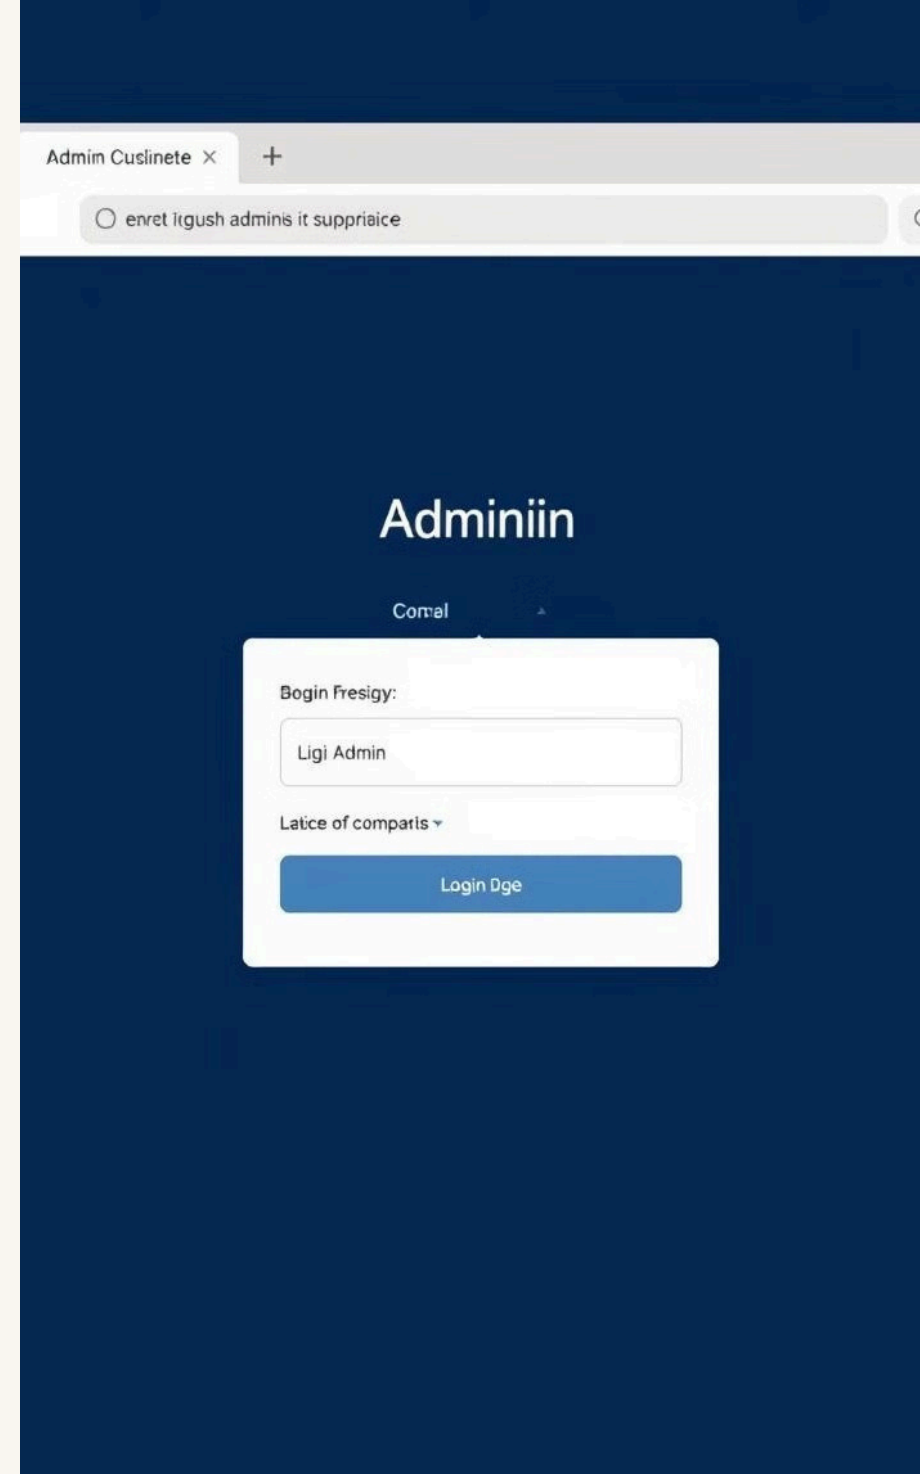

## API Integration

Send inputs as JSON to the server endpoint /admin\_login using a POST request.

## Session Persistence

Check for the adminLoggedIn cookie on page load and redirect to the dashboard if found.

# Admin Dashboard for Applicant Management

1	Applicant Profile Management
2	Eligibility Criteria Filtering
3	Actions and Functionality

- Features:
  - – Filter Applicants by Eligibility Criteria
  - – View and Manage Profiles
  - – Certificate Preview and Download
- Current Progress:
  - – Implemented CPI Threshold Filtering
  - – Designed Profile Layouts with Dynamic Data
  - – Integrated PDF Certificate Handling

# Password Change Page

1

## Input Fields

COAP Registration ID, New Password, Confirm Password

2

## Validation

Password match, COAP Registration ID presence.

3

## Backend Request

Send request to

"<http://127.0.0.1:5000/changepassword>" for password update.

4

## Response Handling

Display success message or error in the console.

The screenshot shows a web application interface for changing a password. At the top, there is a header with the IIT Goa logo and the text "COAP - IIT Goa 2024". Below the header, there is a section titled "In Progress" with a progress bar. The main form contains three input fields: "Your COAP Registration ID", "New Password", and "Confirm Password". A blue button labeled "Change Password" is positioned below the input fields. The background of the page is a dark, blurred image of a building.

# Backend Development: Flask-Based System

## Project Conclusion

This project aimed to create a robust and efficient web-based portal for IIT Goa to manage the COAP process. The portal successfully combines frontend and backend technologies to ensure a user-friendly experience for applicants and administrators.
